ION EXCHANGE SERVICES

“One stop shop for all Spares, Consumables & Services in Water & Waste Water Treatment”

“Any Make / Any Type of Plant”

Ion Exchange with over five decades of expertise pioneered water treatment in India and is today Asia's largest water and environment solutions provider, with a strong global presence. Among few companies worldwide with the entire range of technologies, processes, products and services, we are able to provide total water and environment solutions for every sector – industrial, institutional, municipal and homes, urban and rural.

The optimum performance and life of any water treatment plant plainly depends upon the service support which is efficient, reliable and timely. A service support should be able to cover every aspect of the plant's maintenance and should be capable enough to identify and avert potential problems before they occur. A good service support

should tackle exigencies and suggest measures to improve performance of your plant and reduce its maintenance, optimise inventory levels and eliminate downtime. It assures the supply of genuine spares & consumables and modification of plant to enhance efficiency or increase capacity. In a nutshell, a service support should lay a firm foundation to help you maximise overall production level.

Ion Exchange Services has perfected the above skills over the years. It was formed in order to provide quality services. Our specialist expertise coupled with thorough understanding of our customers' processes enables us to provide integrated solutions that address their individual requirements, totally.

Our integrated services cover every aspect of your water treatment plant's performance to give you a complete package of benefits.

- Identifying and preventing problems before they occur
- Suggesting measures to enhance efficiency, save on capital costs and reduce operating costs
- Eliminating the expense and hassles of in-house supervision, manpower and maintenance
- Modifying plants to improve efficiency and handle changes in influent quality, capacity and treated quality
- Trouble shooting problems and tackling emergencies to eliminate downtime
