

INDION™ CX105 2-WIRE TRANSMITTER

The Indion CX105 is an isolated output 4-20 mA industrial transmitter for reading contacting conductivity sensors as well as TDS and Resistivity. It easily powers the unit with the available 2-wire power supply loop. It is ideal for connecting to a Programmable Logic Controller (PLC) for advanced control systems. It has versatile mounting options for wall or panel mount. Due to a dual display LCD, monitoring both the measuring value and the temperature is simple.

The CX105 is CE certified.

Features

- Large LCD screen for easy reading
- Isolated 4-20 mA analog output
- Automatic temperature compensation
- Flexible mounting options
