

INDION® TX105 pH/ORP TRANSMITTER

The Indion TX105 is an isolated output 4-20 mA industrial transmitter for reading pH or ORP sensors. It easily powers the unit with the available two-wire power supply loop. Ideal for connecting to a Programmable Logic Controller (PLC) for advanced control systems. It has versatile mounting options for wall or panel mount. Due to a dual display LCD, monitoring both the measuring value and the temperature is simple.

The TX105 is CE certified.

Features

- Large LCD screen for easy reading
- Isolated 4-20 mA analog output
- Automatic temperature compensation
- Flexible mounting options
