Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Statement of Responsibility of the Board of Directors

The directors are required in terms of the Companies Act of South Africa to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the company as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with IFRS® Accounting Standards as issued by the International Accounting Standards Board (IASB®). The external auditors are engaged to express an independent opinion on the financial statements.

The annual financial statements are prepared in accordance with IFRS® Accounting Standards and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

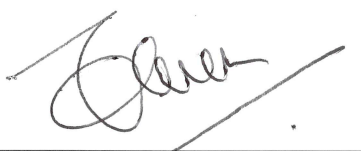

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the board of directors sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the company's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risk across the company. While operating risk cannot be fully eliminated, the company endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

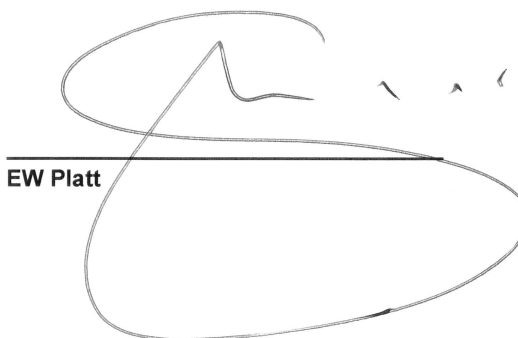

The directors have reviewed the company's cash flow forecast for the year to 31 March 2026 and, in light of this review and the current financial position, they are satisfied that the company has or had access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently auditing and reporting on the company's financial statements. The financial statements have been examined by the company's external auditors and their report is presented on pages 6 to 7.

The annual financial statements set out on pages 8 to 36, which have been prepared on the going concern basis, were approved by the board of directors on 21 May 2025 and were signed on their behalf by:

G Chakravorty

EW Platt

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Report of the Directors

The directors have pleasure in submitting their report on the annual financial statements of Ion Exchange Safic Proprietary Limited for the year ended 31 March 2025.

1. Nature of business

The principal activities of the company are water treatment, liquid waste treatment and recycle, pollution control, solid and hazardous waste management, generation of energy from waste and related matters.

There have been no material changes to the nature of the company's business from the prior year.

2. Review of financial results and activities

The annual financial statements have been prepared in accordance with IFRS® Accounting Standards and the requirements of the Companies Act of South Africa. The accounting policies have been applied consistently compared to the prior year.

Full details of the financial position, results of operations and cash flows of the company are set out in these annual financial statements.

3. Share capital

Ion Exchange India Limited (a company not within South Africa) is the ultimate holding company with 60% shareholding in Ion Exchange Safic Proprietary Limited.

SAFIC Proprietary Limited's (a company incorporated in South Africa) shareholding is 40% in Ion Exchange Safic Proprietary Limited.

The company issued an additional 1 000 ordinary shares of no par value to its existing shareholders during the year ended 31 March 2024. There were no changes to the authorised share capital during the year under review.

4. Dividends

No dividends were declared or paid to the shareholders (2024: R Nil).

5. Directorate

The directors in office at the date of this report are as follows:

Directors	Designation	Nationality
G Chakravorty	Executive	Indian
DM Cutter	Executive	South African
JP Pathare	Alternate	Indian
MP Patni	Executive	Indian
EW Platt	Executive	South African
FC Platt	Non-Executive	South African
LRR Quinn	Alternate	South African
NM Ranadive	Alternate	Indian
R Sharma	Executive	Indian

There have been no changes to the directorate for the year under review.

6. Directors' interests in share capital of the company

The directors have no interest in the share capital of the company.

7. Directors' interests in contracts

During the financial year, no contracts were entered into which directors or officers of the company had an interest and which significantly affected the business of the company.

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Report of the Directors

8. Events after the reporting period

The directors are not aware of any material event which occurred after the reporting date and up to the date of this report.

9. Going concern

The directors believe that the company has adequate financial resources to continue in operation for the foreseeable future and accordingly the audited annual financial statements have been prepared on a going concern basis. The directors have satisfied themselves that the company is in a sound financial position and that it has access to sufficient borrowing facilities to meet its foreseeable cash requirements. The directors are not aware of any new material changes that may adversely impact the company. The directors are also not aware of any material non-compliance with statutory or regulatory requirements or of any pending changes to legislation which may affect the company.

10. Auditors

The company's auditors, PKF VGA, were retained in accordance with the Companies Act of South Africa for the financial year ended 31 March 2025.

Independent Auditor's Report

To the Shareholder of ION Exchange Safic Proprietary Limited

Opinion

We have audited the financial statements of ION Exchange Safic Proprietary Limited (the company) set out on pages 8 to 36, which comprise the statement of financial position as at 31 March 2025 and the statement of profit or loss and other comprehensive income; the statement of changes in equity; and the statement of cash flows for the year then ended; and notes to the financial statements, including material accounting policy information.

In our opinion, the financial statements present fairly, in all material respects, the financial position of ION Exchange Safic Proprietary Limited as at 31 March 2025, and its financial performance and cash flows for the year then ended, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Companies Act of South Africa.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the document titled "ION Exchange Safic Proprietary Limited annual financial statements for the year ended 31 March 2025", which includes the Directors' Report and the Audit Committee's Report as required by the Companies Act of South Africa and the supplementary information as set out on pages 37 to 38. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Directors: HC Nieuwoudt CA(SA) IRBA no. 507160 | V Kathan(CA)SA IRBA no.033255 | L Penning (CA) SA IRBA no.131425

PKF VGA Incorporated is a member firm of the PKF International Limited network of legally independent firms and does not accept any responsibility or liability for the actions or inactions on the part of any other individual member firm or firms. PKF in South Africa practices as separate incorporated entities in Gauteng, KwaZulu-Natal, Eastern Cape, Free State and Western Cape.

Independent Auditor's Report

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1. Material accounting policies

The principal accounting policies applied in the preparation of these annual financial statements are set out below.

1.1 Basis of preparation

The annual financial statements have been prepared in accordance with IFRS® Accounting Standards as issued by the International Accounting Standards Board (IASB®) and IFRIC® Interpretations ("IFRS IC") issued and effective at the time of preparing these annual financial statements, and the Companies Act of South Africa. The annual financial statements have been prepared on the historical cost basis, except as indicated below and incorporate the principal accounting policies set out below. They are presented in South African Rands.

These accounting policies are consistent with the previous period.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Key sources of estimation uncertainty

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. For details of the key assumptions and inputs used, refer to the individual notes addressing financial assets.

Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The company recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the company to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the company to realise the net deferred tax assets recorded at the end of the reporting period could be impacted.

1.3 Property, plant and equipment

Property, plant and equipment are tangible assets which the company holds for its own use or for rental to others and which are expected to be used for more than one year.

An item of property, plant and equipment is recognised as an asset when it is probable that future economic benefits associated with the item will flow to the company, and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset, including the capitalisation of borrowing costs on qualifying assets and adjustments in respect of hedge accounting, where appropriate.

Expenditure incurred subsequently for major services, additions to or replacements of parts of property, plant and equipment are capitalised if it is probable that future economic benefits associated with the expenditure will flow to the company and the cost can be measured reliably. Day to day servicing costs are included in profit or loss in the year in which they are incurred.

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1.3 Property, plant and equipment (continued)

Property, plant and equipment is subsequently stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is charged to write off the asset's carrying amount over its estimated useful life to its estimated residual value, using a method that best reflects the pattern in which the asset's economic benefits are consumed by the company. Leased assets are depreciated in a consistent manner over the shorter of their expected useful lives and the lease term. Depreciation is not charged to an asset if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Furniture and fixtures	Straight line	10 years
IT equipment	Straight line	3 - 5 years
Computer software	Straight line	5 years
Leasehold improvements	Straight line	10 years
Branding	Straight line	1 - 3 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Impairment tests are performed on property, plant and equipment when there is an indicator that they may be impaired. When the carrying amount of an item of property, plant and equipment is assessed to be higher than the estimated recoverable amount, an impairment loss is recognised immediately in profit or loss to bring the carrying amount in line with the recoverable amount.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property, plant and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

1.4 Financial instruments

Financial instruments held by the company are classified in accordance with the provisions of IFRS 9 Financial Instruments.

Broadly, the classification possibilities, which are adopted by the company, as applicable, are as follows:

Financial assets which are debt instruments:

- Amortised cost. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is met by holding the instrument to collect contractual cash flows).

Financial liabilities:

- Amortised cost.

The specific accounting policies for the classification, recognition and measurement of each type of financial instrument held by the company are presented below:

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1.4 Financial instruments (continued)

Trade and other receivables

Classification

Trade and other receivables, excluding, when applicable, VAT and prepayments, are classified as financial assets subsequently measured at amortised cost (note 7).

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the company's business model is to collect the contractual cash flows on trade and other receivables.

Recognition and measurement

Trade and other receivables are recognised when the company becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the receivable initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

Impairment and estimated credit losses (ECL)

The company recognises a loss allowance for expected credit losses on trade and other receivables, excluding deposits, other receivables, VAT and prepayments. The amount of expected credit losses is updated at each reporting date.

The company measures the loss allowance for trade and other receivables at an amount equal to lifetime expected credit losses (lifetime ECL), which represents the expected credit losses that will result from all possible default events over the expected life of the receivable.

Measurement and recognition of expected credit losses

The company makes use of a provision matrix as a practical expedient to the determination of expected credit losses on trade and other receivables. The provision matrix is based on historic credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current and forecast direction of conditions at the reporting date, including the time value of money, where appropriate.

The customer base is widespread and does not show significantly different loss patterns for different customer segments. The loss allowance is calculated on a collective basis for all trade and other receivables in totality. Details of the provision matrix is presented in note 7.

An impairment gain or loss is recognised in profit or loss with a corresponding adjustment to the carrying amount of trade and other receivables, through use of a loss allowance account. The impairment loss is included in other operating expenses in profit or loss as a movement in credit loss allowance (note 15).

Write off policy

The company writes off a receivable when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Receivables written off may still be subject to enforcement activities under the company recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

1.4 Financial instruments (continued)

Trade and other payables

Classification

Trade and other payables (note 11), excluding VAT and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

They are recognised when the company becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These financial assets are classified as financial assets carried at amortised cost.

Bank overdrafts

Bank overdrafts are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Derecognition

Financial assets

The company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the company retains substantially all the risks and rewards of ownership of a transferred financial asset, the company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The company derecognises financial liabilities when, and only when, the company obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

1.5 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1.5 Tax (continued)

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.6 Leases

The company assesses whether a contract is, or contains a lease, at the inception of the contract.

A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the company has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

In circumstances where the determination of whether the contract is or contains a lease requires significant judgement, the relevant disclosures are provided in the significant judgments and sources of estimation uncertainty section of these accounting policies.

Company as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the company is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the company recognises the lease payments as an operating expense (note 15) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated to each lease component on the basis of the relative stand-alone prices of the lease components and the aggregate stand-alone price of the non-lease components (where non-lease components exist).

Accounting Policies

1.6 Leases (continued)

Details of leasing arrangements where the company is a lessee are presented in note 10 Lease liabilities (company as lessee).

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives; and
- lease payments in an optional renewal period if the company is reasonably certain to exercise an extension option.

The lease liability is presented as a separate line item on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance costs (note 17).

The company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change in the assessment of whether the company will exercise a purchase, termination or extension option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);
- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;
- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Right-of-use assets are presented as a separate line item on the Statement of Financial Position.

Lease payments included in the measurement of the lease liability comprise the following:

- the initial amount of the corresponding lease liability;
- any lease payments made at or before the commencement date;
- any initial direct costs incurred;
- any estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, when the company incurs an obligation to do so, unless these costs are incurred to produce inventories; and
- less any lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

For right-of-use assets which are depreciated over their useful lives, the useful lives are determined consistently with items of the same class of property, plant and equipment. Refer to the accounting policy for property, plant and equipment for details of useful lives.

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1.6 Leases (continued)

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate. Each part of a right-of-use asset with a cost that is significant in relation to the total cost of the asset is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

1.7 Inventories

Inventories are measured at the lower of cost and net realisable value on the first in first out cost formula.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

1.8 Impairment of assets

The company assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation other than goodwill is recognised immediately in profit or loss. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

1.9 Share capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

If the company reacquires its own equity instruments, the consideration paid, including any directly attributable incremental costs (net of income taxes) on those instruments are deducted from equity until the shares are cancelled or reissued. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the company's own equity instruments. Consideration paid or received shall be recognised directly in equity.

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1.10 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

1.11 Provisions and contingencies

Provisions are recognised when:

- the company has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are not recognised for future operating losses.

1.12 Revenue from contracts with customers

Revenue is measured at the fair value of the consideration received or receivable and represents the amounts receivable for goods and services provided in the normal course of business, net of trade discounts and volume rebates, and value added tax.

Performance obligations and timing of revenue recognition

The majority of the company's revenue is derived from selling goods with revenue recognised at a point in time when control of the goods has transferred to the customer. This is generally when the goods are delivered to the customer.

However, for export sales, control might also be transferred when delivered either to the port of departure or port of arrival, depending on the specific terms of the contract with a customer. There is limited judgement needed in identifying the point control passes: once physical delivery of the products to the agreed location has occurred, the company no longer has physical possession, usually will have a present right to payment (as a single payment on delivery) and retains none of the significant risks and rewards of the goods in question.

A small minority of contracts are negotiated on a bill and hold basis. In such arrangements revenue is recognised even though the company still has physical possession only if:

- the arrangement is substantive (i.e. requested by the customer);
- the finished goods have been identified separately as belonging to the customer;
- the product is ready for physical transfer to the customer; and
- An Ion Exchange Safic (Pty) Ltd company does not have the ability to use the product to direct it to another customer.

The company's small consultancy division provides services to clients, with revenue recognized as the services are provided. This is because some projects require ongoing services to maintain their productivity. If a client cancels a contract before completion, the company will still be entitled to payment for the work done. For projects in progress, revenue is recognized based on how much of the work is completed. This is determined either by comparing actual hours worked to total expected hours or by using a cost sheet with estimated project timelines and completion stages. This method accurately reflects the services provided and the company's entitlement to payment based on its work completed so far.

Accounting Policies

1.12 Revenue from contracts with customers (continued)

Determining the transaction price

The company earns most of its revenue from fixed contracts based on market sector and product type. The revenue from each contract is determined using fixed percentage prices. The selling price is calculated by adding a sales margin to the cost price, which includes intercompany transfer price and import cost. For different product categories like chemicals, resin, and membranes, different sales margins apply. These margins are set based on whether the customer is a distributor or end customer and are quoted per unit or kilogram.

There are exceptions to this rule when there's variable consideration like volume rebates. In these cases, the company estimates contract revenue while ensuring that future revenue won't need to be adjusted significantly when the volume rebates are finalized.

Allocating amounts to performance obligations

Contracts typically have fixed prices per product, with bulk order discounts available. Allocating the contract price per unit is straightforward: divide the total contract price by the number of units ordered. If a customer orders multiple product lines, the company splits the total contract price based on each product's standalone selling price. Discounts for future contracts, offered to secure repeat business, are treated as "material rights." This defers some initial revenue until subsequent sales occur or the discount rights expire. The company estimates the likelihood of future discounts being used and their value per customer, done on a contract-by-contract basis through discussions during original contract negotiations, as past experiences aren't sufficient for reliable predictions due to unique customer circumstances.

Costs of obtaining long-term contracts and costs of fulfilling contracts

Commissions paid to sales staff for securing design contracts lasting longer than a year are recorded upfront as prepayments. These commissions are then gradually recognized as revenue is earned from the contract, aligning with the pattern of revenue recognition. The commission amount is the amount paid, no judgment is required to determine it.

For contracts involving the sale of goods, the costs of fulfilling contracts are included in the inventory's carrying amount. In service contracts, where revenue is recognised over time, based on the progress of the work, no separate asset recognition is needed. This is because control of the service is continuously transferred to the customer as the work progresses.

1.13 Cost of sales

When inventories are sold, the carrying amount of those inventories are recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as a cost of sales in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The related cost of providing services recognised as revenue in the current period is included in cost of sales.

Contract costs comprise:

- costs that relate directly to the specific contract;
- costs that are attributable to contract activity in general and can be allocated to the contract; and
- such other costs as are specifically chargeable to the customer under the terms of the contract.

1.14 Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred.

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Accounting Policies

1.15 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Rands, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Rands by applying to the foreign currency amount the exchange rate between the Rand and the foreign currency at the date of the cash flow.

Notes to the Annual Financial Statements

2. New Standards and Interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the company has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Impact:
• Classification of Liabilities as Current or Non-Current - Amendment to IAS 1	01 January 2024	No impact
• Amendments to IFRS 16: Lease liability in a sale and leaseback	01 January 2024	No impact
• Amendments to IAS 1: Non-current Liabilities with Covenants	01 January 2024	No impact
• Amendments to IAS 7 and IFRS 7: Supplier Finance Arrangements	01 January 2024	No impact

2.2 Standards and interpretations not yet effective

The company has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the company's accounting periods beginning on or after 01 April 2025 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Lack of Exchangeability - Amendments to IAS 21	01 January 2025	Unlikely there will be a material impact
• Amendments to IFRS 9 and IFRS 7 - Amendments to the Classification and Measurement of Financial Instruments	01 January 2026	Unlikely there will be a material impact
• IFRS 18 Presentation and Disclosure in Financial Statements	01 January 2027	Unlikely there will be a material impact
• IFRS 19 Subsidiaries without Public Accountability: Disclosures	01 January 2027	Unlikely there will be a material impact

At amortised cost	11 439 281	9 073 921
-------------------	------------	-----------

Exposure to credit risk

Trade receivables inherently expose the company to credit risk, being the risk that the company will incur financial loss if customers fail to make payments as they fall due.

A loss allowance is recognised for all trade receivables, in accordance with IFRS 9 Financial Instruments, and is monitored at the end of each reporting period. In addition to the loss allowance, trade receivables are written off when there is no reasonable expectation of recovery, for example, when a debtor has been placed under liquidation. Trade receivables which have been written off are not subject to enforcement activities.

The company measures the loss allowance for trade receivables by applying the simplified approach which is prescribed by IFRS 9. In accordance with this approach, the loss allowance on trade receivables is determined as the lifetime expected credit losses on trade receivables. These lifetime expected credit losses are estimated using a provision matrix, which is presented below. The provision matrix has been developed by making use of past default experience of debtors but also incorporates forward looking information and general economic conditions of the industry as at the reporting date.

There has been no change in the estimation techniques or significant assumptions made during the current reporting period.

The company's historical credit loss experience does not show significantly different loss patterns for different customer segments. The provision for credit losses is therefore based on past due status without disaggregating into further risk profiles. The loss allowance provision is determined as follows:

10. Lease liabilities

The lease balances below have been recognized from the lease agreement ending 31 March 2028 of office space and warehouse space from Safic Facility Management Services Proprietary Limited until 31 March 2028, with an option to renew.

2025	Land and buildings	Plant, machinery and motor vehicles	Total
Lease liabilities at the beginning of the year	6 400 279	-	6 400 279
Additions / (disposals)	-	-	-
Interest expense	699 572	-	699 572
Lease payments	(1 781 319)	-	(1 781 319)
Lease liabilities at the end of the year	5 318 532	-	5 318 532

2024	Land and buildings	Plant, machinery and motor vehicles	Total
Lease liabilities at the beginning of the year	301 539	26 526	328 065
Additions / (disposals)	6 983 517	-	6 983 517
Interest expense	818 107	1 244	819 351
Lease payments	(1 702 884)	(27 770)	(1 730 654)
Lease liabilities at the end of the year	6 400 279	-	6 400 279

The lease payments represent rentals payable by the company for certain of its office properties, warehouse spaces and a forklift.

11. Trade and other payables

Financial instruments:

Trade payables	15 919 613	16 286 142
Accrued leave pay and bonus	343 690	321 266
Payroll accruals	156 116	151 879
Provision for rate of exchange	715 306	-
Accrued audit fees	210 440	181 150
Sundry accruals	528 639	707 161

Non-financial instruments:

VAT	9 270	258 469
	17 883 074	17 906 067

Included in trade payables are amounts due to the shareholders to the value of R 3 714 235 (2024: R 3 211 549).

12. Provisions

Reconciliation of provisions - 2025

	Opening balance	Additions	Total
Project estimated costs	-	7 733 996	7 733 996

Provision for project estimated costs consists of future costs for the WUC project R 7 280 985 and the Protea Chemicals project R 453 011.

Capital risk management

The company's objectives when managing capital are to safeguard the company's ability to continue as a going concern in order to provide returns for shareholder and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

Financial risk management

Overview

The company's activities expose it to a variety of financial risks: market risk (including currency risk), credit risk and liquidity risk.

Ion Exchange Safic Proprietary Limited

(Registration number 2002/009690/07)

Annual Financial Statements for the year ended 31 March 2025

Notes to the Annual Financial Statements

22. Financial instruments and risk management (continued)

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The company is exposed to credit risk on loans receivable (at amortised cost), trade and other receivables and cash and cash equivalents.

Credit risk exposure arising on cash and cash equivalents is managed by the company through dealing with well-established financial institutions with high credit ratings.

Credit loss allowances for expected credit losses are recognised for all debt instruments.

In order to calculate credit loss allowances, management determine whether the loss allowances should be calculated on a 12 month or on a lifetime expected credit loss basis. This determination depends on whether there has been a significant increase in the credit risk since initial recognition. If there has been a significant increase in credit risk, then the loss allowance is calculated based on lifetime expected credit losses. If not, then the loss allowance is based on 12 month expected credit losses. This determination is made at the end of each financial period. Thus the basis of the loss allowance for a specific financial asset could change year on year.

Management applies the principle that if a financial asset's credit risk is low at year end, then, by implication, the credit risk has not increased significantly since initial recognition. In all such cases, the loss allowance is based on 12 month expected credit losses. Credit risk is assessed as low if there is a low risk of default. When determining the risk of default, management consider information such as payment history to date, industry in which the customer is employed, period for which the customer has been employed, external credit references etc. Credit risk is not assessed to be low simply because of the value of collateral associated with a financial instrument. If the instrument would not have a low credit risk in the absence of collateral, then the credit risk is not considered low when taking the collateral into account. Trade receivables which do not contain a significant financing component are the exceptions and are discussed below.

Where necessary, the assessment for a significant increase in credit risk is made on a collective basis. Management typically adopts this approach when information relevant to the determination of credit risk is not available on an individual instrument level. Often, the only information available on individual instruments which could indicate an increase in credit risk, is "past due" information. It is typical that more forward-looking information is generally more readily available on a collective basis. Therefore, making the determination on a collective basis, helps to ensure that credit loss allowances are determined on the basis of lifetime expected credit losses before they reach the point of being past due. Forward looking, macro-economic information is applied on a collective basis when it is readily available without undue cost or effort. When loss allowances are determined on a collective basis, management determines the loss allowances by grouping financial instruments on the basis of shared credit risk characteristics.

For trade receivables which do not contain a significant financing component, the loss allowance is determined as the lifetime expected credit losses of the instruments.

The maximum exposure to credit risk is presented in the table below:

	2025			2024		
	Gross carrying amount	Credit loss allowance	Amortised cost / fair value	Gross carrying amount	Credit loss allowance	Amortised cost / fair value
Trade and other receivables	11 881 108	(441 827)	11 439 281	9 090 079	(16 158)	9 073 921

Liquidity risk

The company's risk to liquidity is a result of obligations associated with financial liabilities of the company and the availability of funds to meet those obligations. The company manages liquidity risk through an on-going review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequately utilised borrowing facilities are monitored.

The table below analyses the company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual cash flows. Balances due equal their carrying balances.

--	-----------	-----------

22. Financial instruments and risk management (continued)

Foreign currency risk

The company is exposed to foreign exchange risk arising primarily with respect to the US dollar. Foreign exchange risk arises from commercial transactions in foreign currencies. The company manages its foreign exchange risk using forward exchange contracts, which are transacted with financial institutions. Foreign exchange risk arises when commercial transactions are denominated in a currency that is not the entity's functional currency.

The company entered into forward exchange contracts (FECs) to buy and sell specified amounts of foreign currency in the future at a predetermined exchange rate. The contracts were entered into to manage the company's exposure to fluctuations in foreign currency exchange rates on specific transactions. The company did not use forward exchange contracts for speculative purposes.

Exposure in Rand

The net carrying amounts, in Rand, of the various exposures, are denominated in the following currencies. The amounts have been presented in Rand by converting the foreign currency amounts at the closing rate at the reporting date:

US Dollar exposure:

Current assets:

Cash and cash equivalents	2 404 841	2 711 305
---------------------------	-----------	-----------

Liabilities:

Trade payables / Contract	(13 553 497)	(13 567 703)
---------------------------	--------------	--------------

Net US Dollar exposure	(11 148 656)	(10 856 398)
-------------------------------	---------------------	---------------------

Exposure in foreign currency amounts

The net carrying amounts, in foreign currency of the above exposure was as follows:

US Dollar exposure:

Current assets:

Cash and cash equivalents	131 446	142 756
---------------------------	---------	---------

Liabilities:

Trade payables / Contract	(740 819)	(680 827)
---------------------------	-----------	-----------

Net US Dollar exposure	(609 373)	(538 071)
-------------------------------	------------------	------------------

Foreign currency sensitivity analysis

At 31 March 2025, if the Rand/dollar exchange rate had been 1% (2024: 1%) higher or lower during the year, with all other variables held constant, profit or loss for the year would have been R 111 087 (2024: R 108 564) higher or lower.

Interest rate risk

As the company has no significant interest-bearing assets, the company's income and operating cash flows are substantially independent of changes in market interest rates.

Notes to the Annual Financial Statements

23. Going concern

The directors believe that the company has adequate financial resources to continue in operation for the foreseeable future and accordingly the audited annual financial statements have been prepared on a going concern basis. The directors have satisfied themselves that the company is in a sound financial position and that it has access to sufficient borrowing facilities to meet its foreseeable cash requirements. The directors are not aware of any new material changes that may adversely impact the company. The directors are also not aware of any material non-compliance with statutory or regulatory requirements or of any pending changes to legislation which may affect the company.

24. Events after the reporting period

The directors are not aware of any material event which occurred after the reporting date and up to the date of this report.
